2. For Jobs near me, can we have a map GIS view

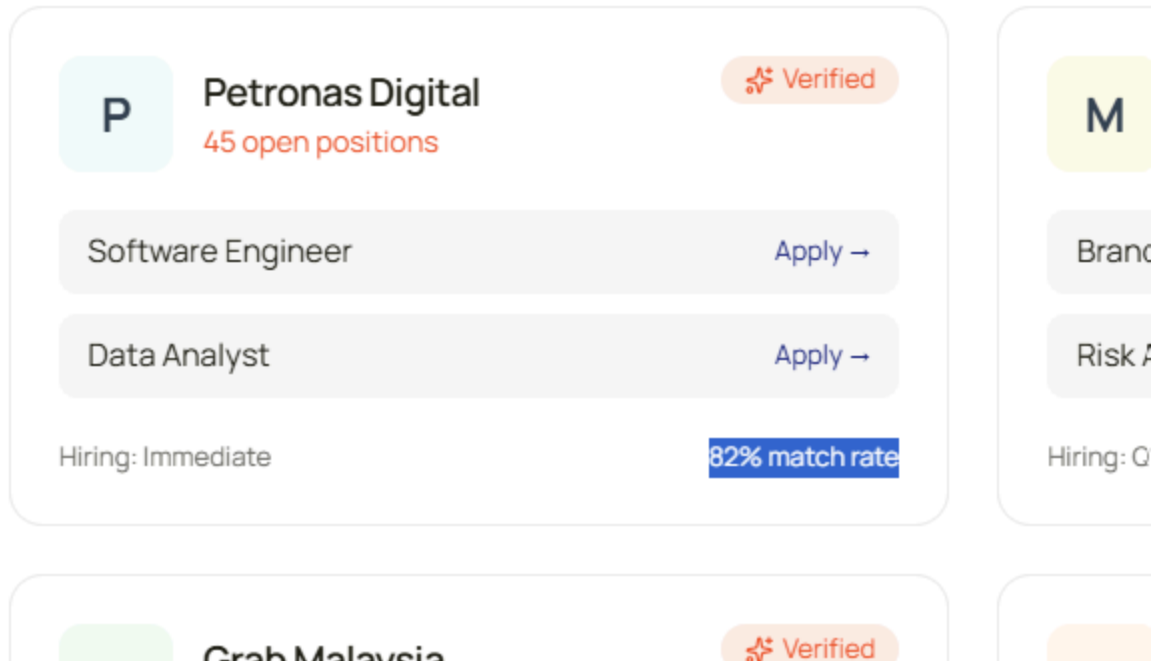

3. The sub line doesn't make sense.. Case Officer handles Job Seeker profile cases, and doesn't work on market intelligence

4. Each Job Post has it's own match score, and hiring time- like immediate, or in Q1 2026, etc. The one which we can see in the design shows consolidated match score and hiring time. We need to segregate based on the individual job posting.

Top employers actively hiring now

5. No call to action button here !

6. Why some posting are in horizontal and some in vertical. The posting which are in linear format, does not have image, but one below, have image. And the below one are not having match score ?? Also pls utilize the blank space.

7. Retail and F&B

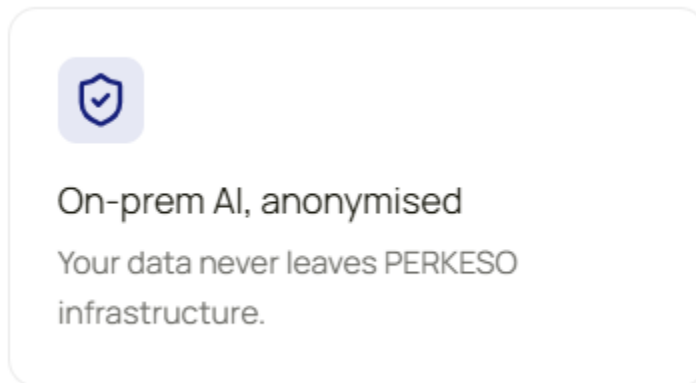

Correct wording.

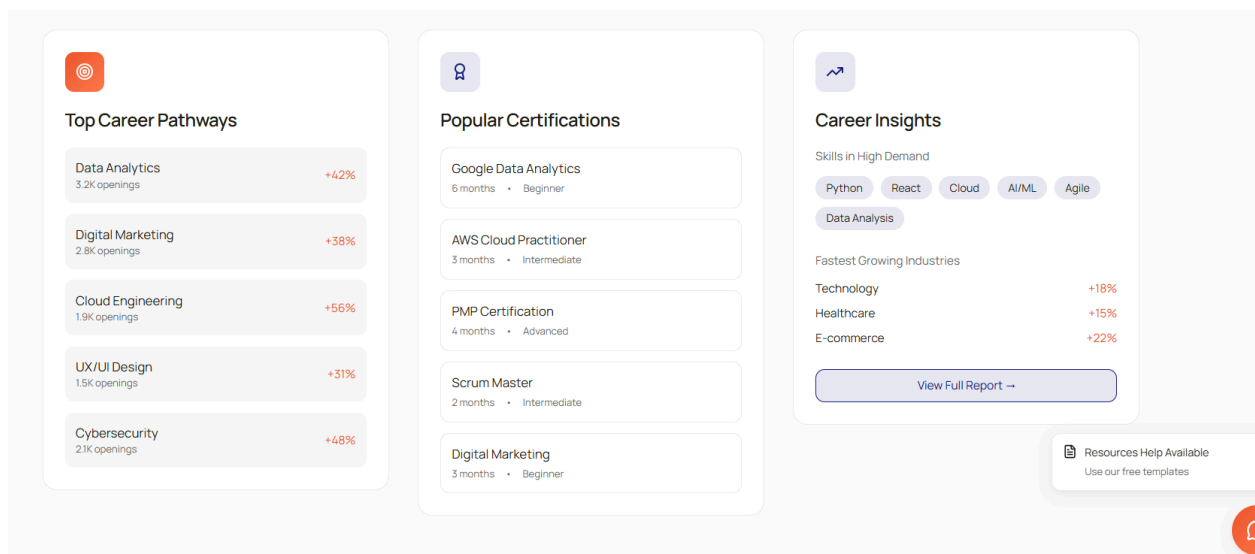

8. We have to remove the Signal wording

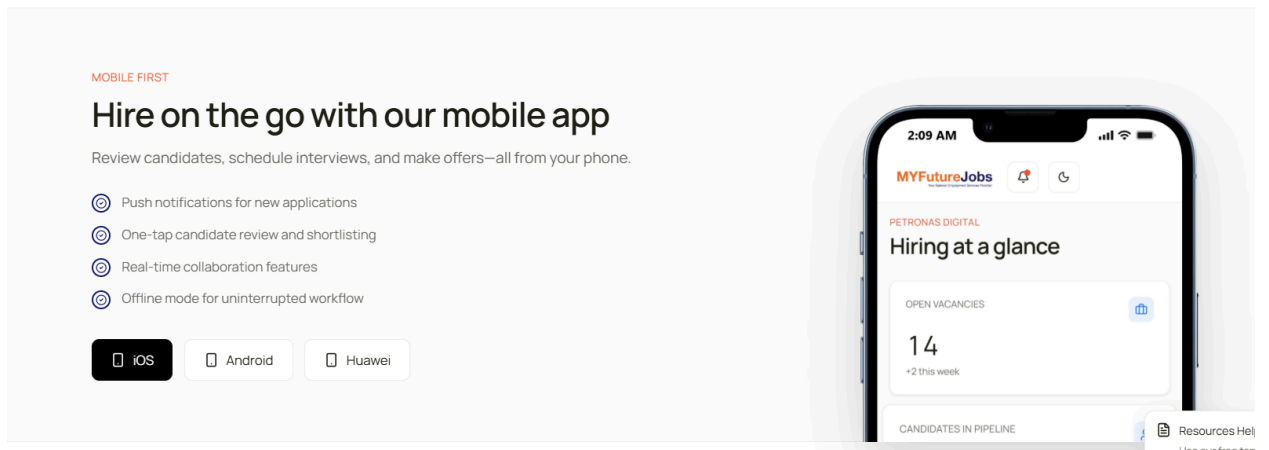

9. Can we change the wording of this ? like - Secured DATA

10. All the sections should be the same size.

11. Why this banner only focus on Employer side? Should also show inclusive of Job Seeker as well.

Sign - In page

1. The Job Seeker can login just with the IC number. Remove login via Perkeso SSO for the job seeker. Better use IC number as input .

Job Seeker

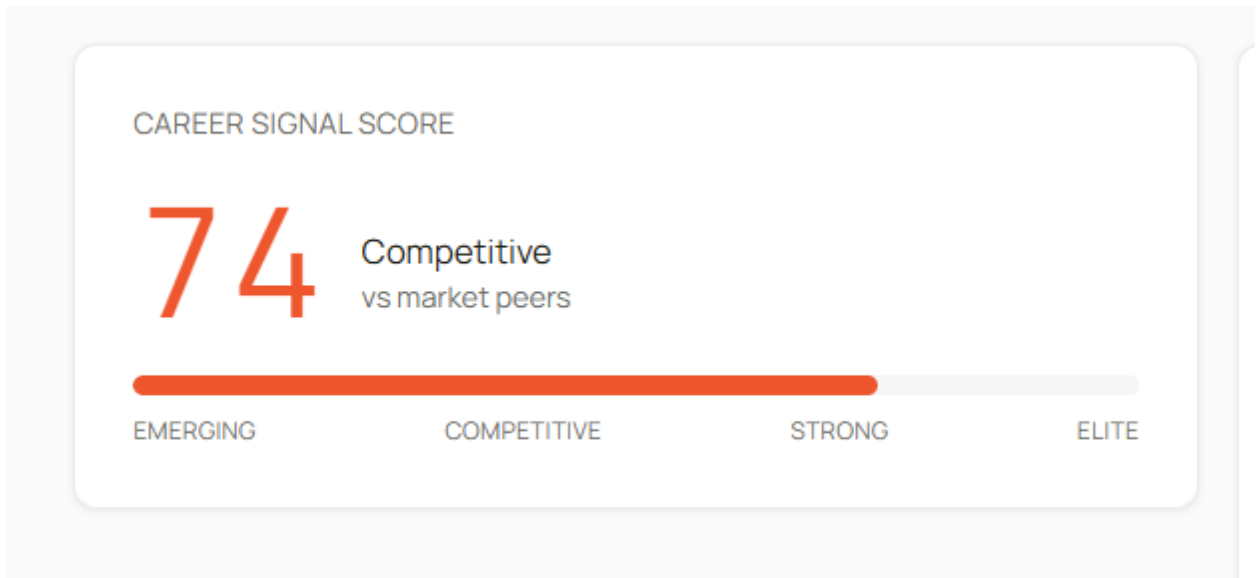

1. We have to remove this career signal

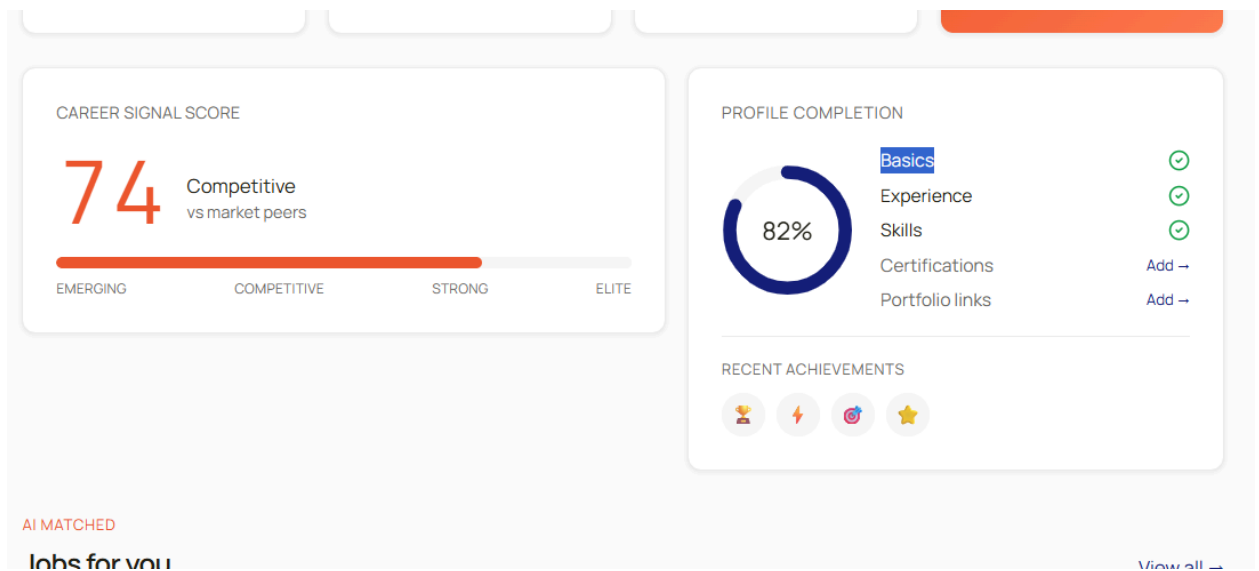

2. What does this +0 means, when we are already showing the number on the card

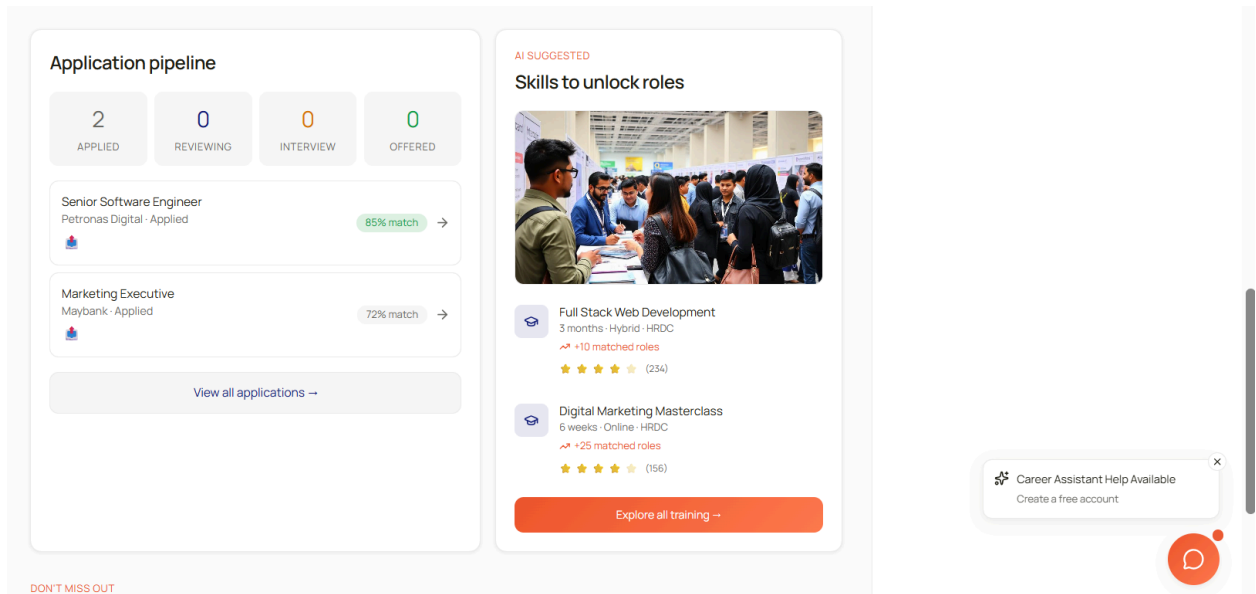

3. Career Signal score, we have to replace with some other metrics

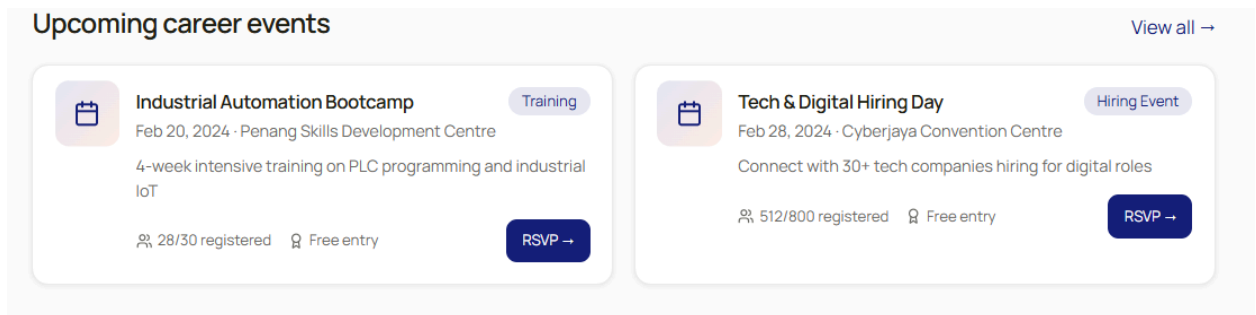

4. Space should be properly utilized, there are a lot of blank spaces..

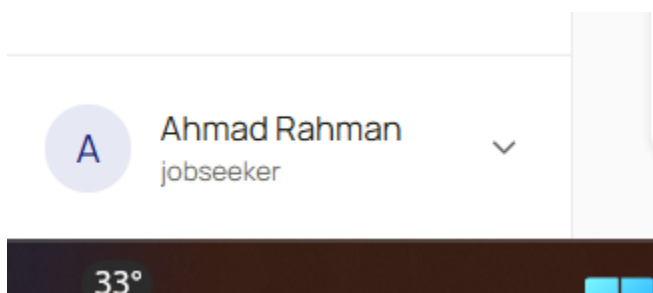

5. Must utilize the blank space

6. Better Show the location also here !

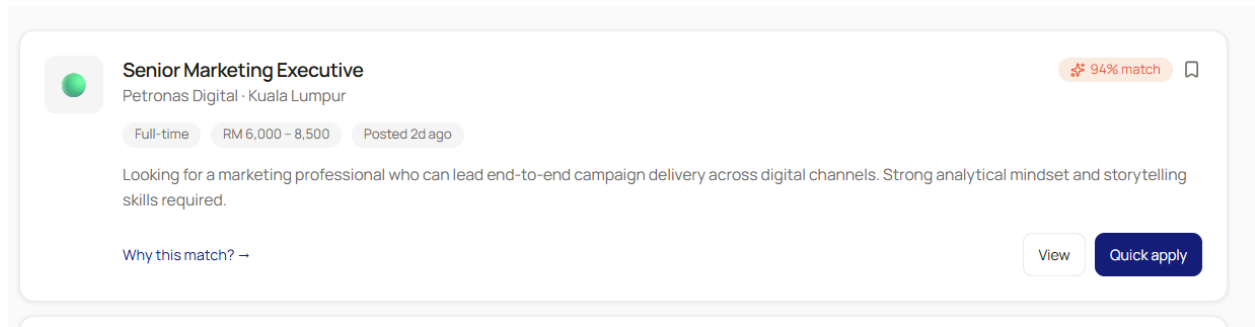

7. Use some english name like Mike , John

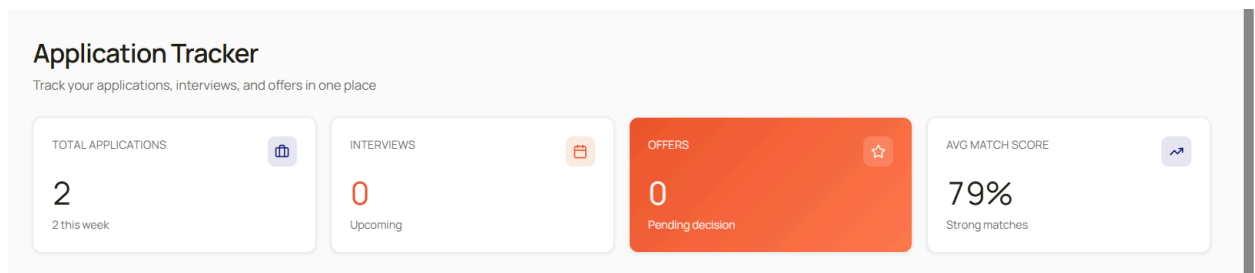

Find Jobs

1. We need to replace this wording “Why this match ?”, replace with - Recommended + AI logo + i button, when clicked on i button it should show why it matches.

Applications

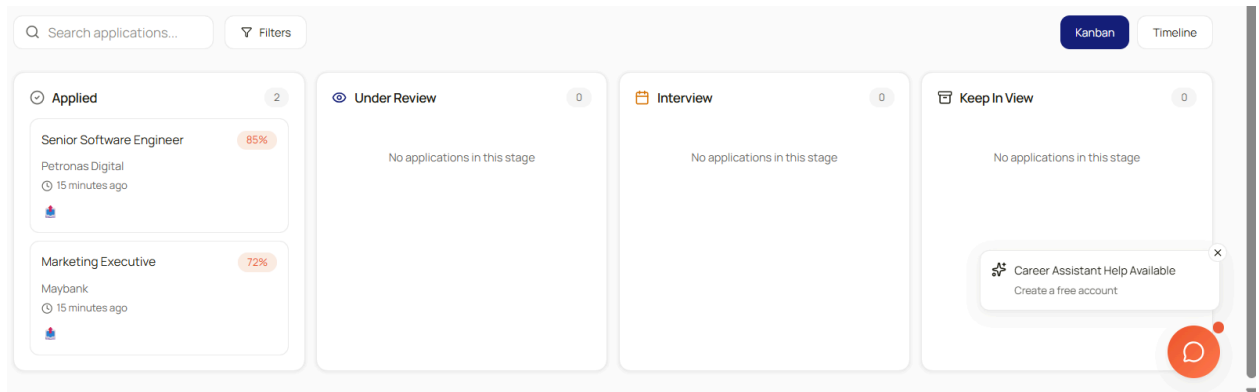

1. The average score doesn't make any sense for Job seeker, as each individual job has its own match score , please replace it with some other metrics . We can use metrics like Pending, or Application viewed.

2. Remove Career Signal from side menu

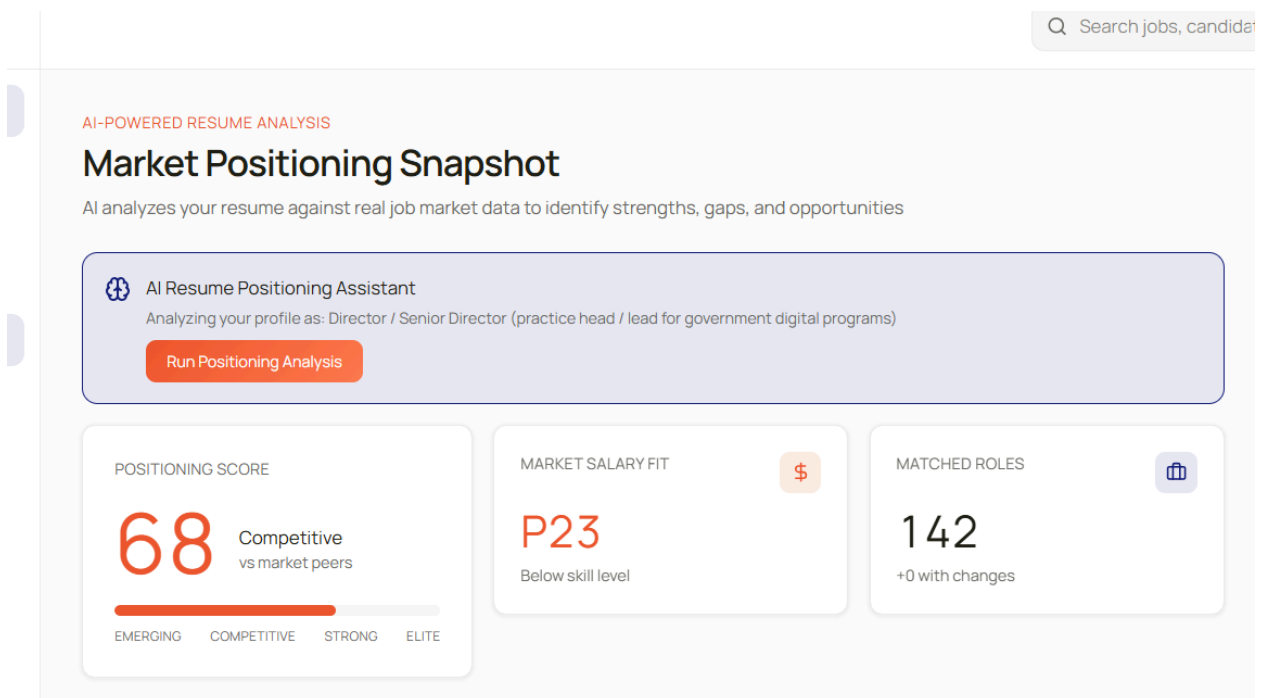

3. If selected as Kanban, please utilize the blank space

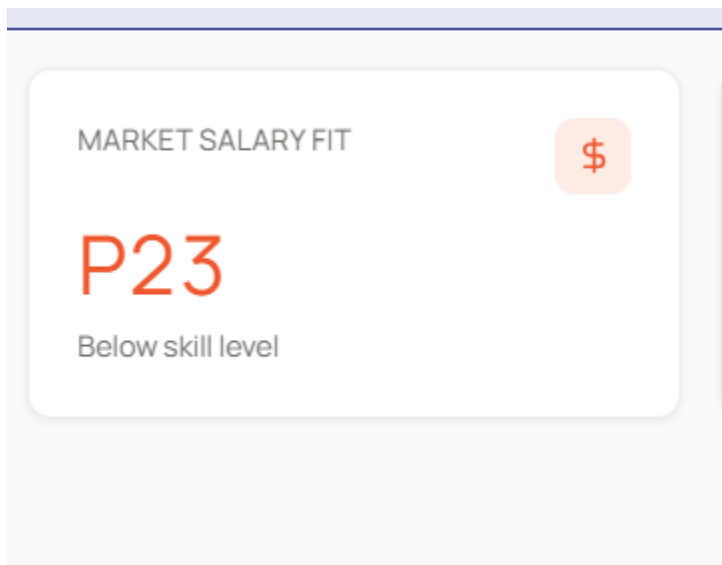

CV Market Positioning

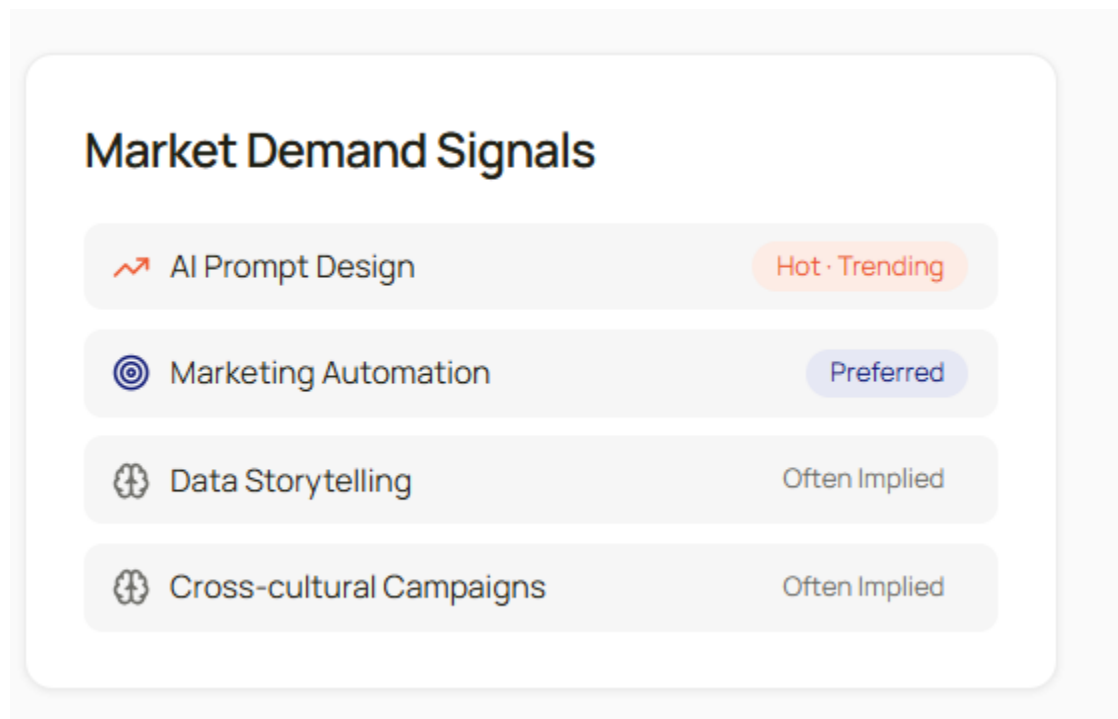

1. Keep all boxes aligned in same format

2. Use MYR instead of \$, and what does P23 means ?

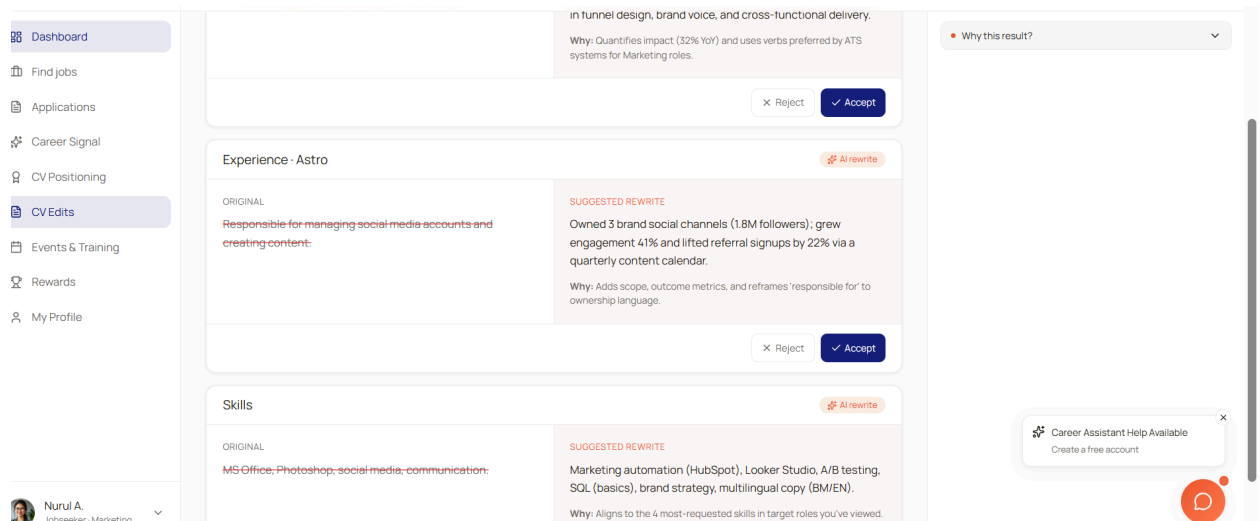

3.Can we rename this to just Market Demand

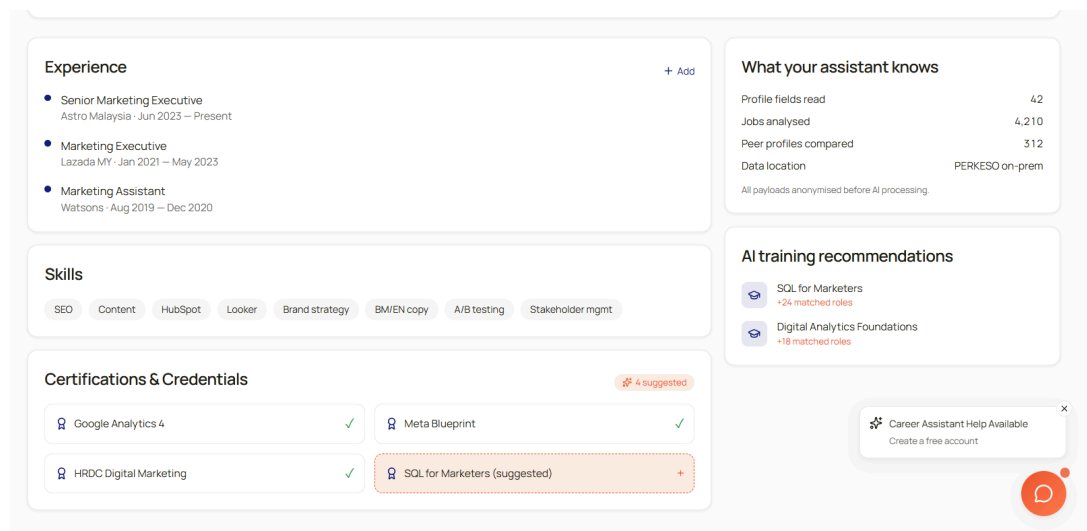

CV Edits

1. For CV Edits we can utilize the blank space here. Maybe we can show the CV itself, with the changes we are implementing.

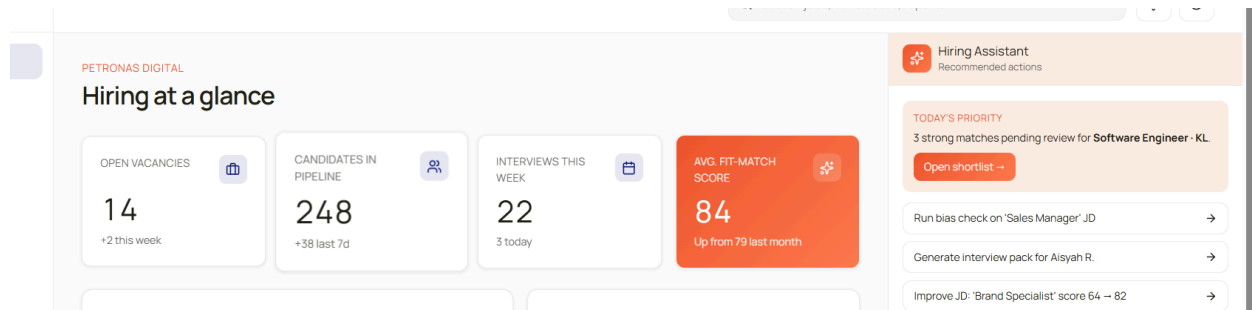

My Profile

1. Add Education Qualification section , and personal information section like location, contact info (primary and secondary)

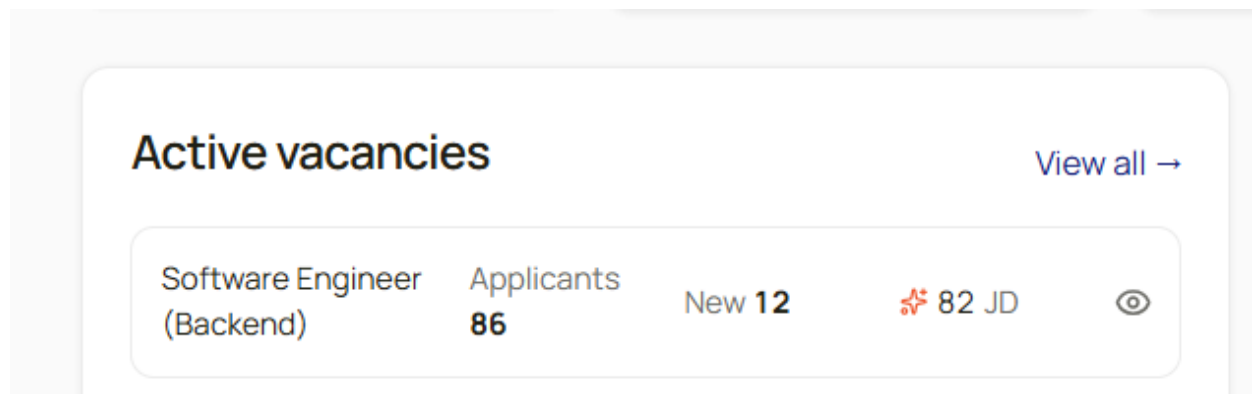

EMPLOYER

1. Remove Average Fit Match score, add some other metrics like - Total Hires in the last 1 month.

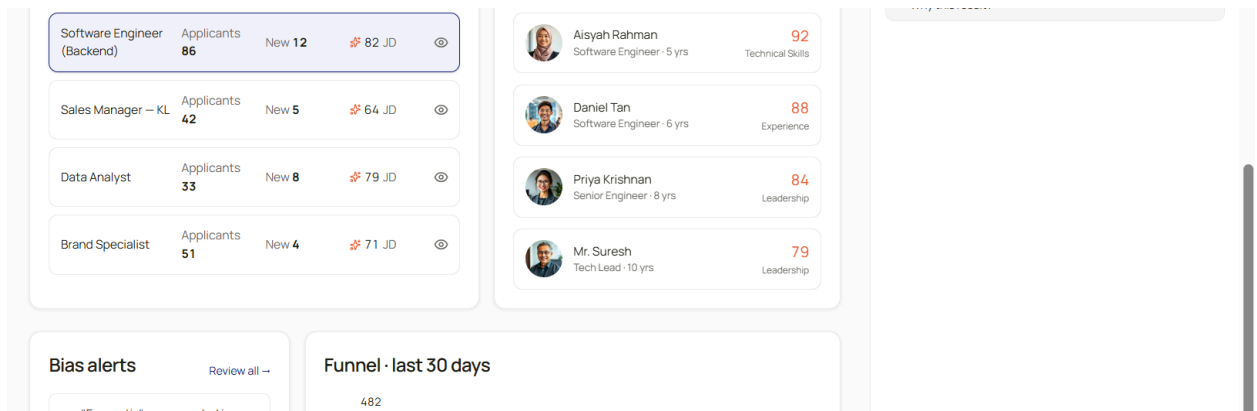

2. This JD score need to be properly labelled. Like JD Score :84%

3. Here also pls mention in %

4. Utilize the blank space

Vacancies

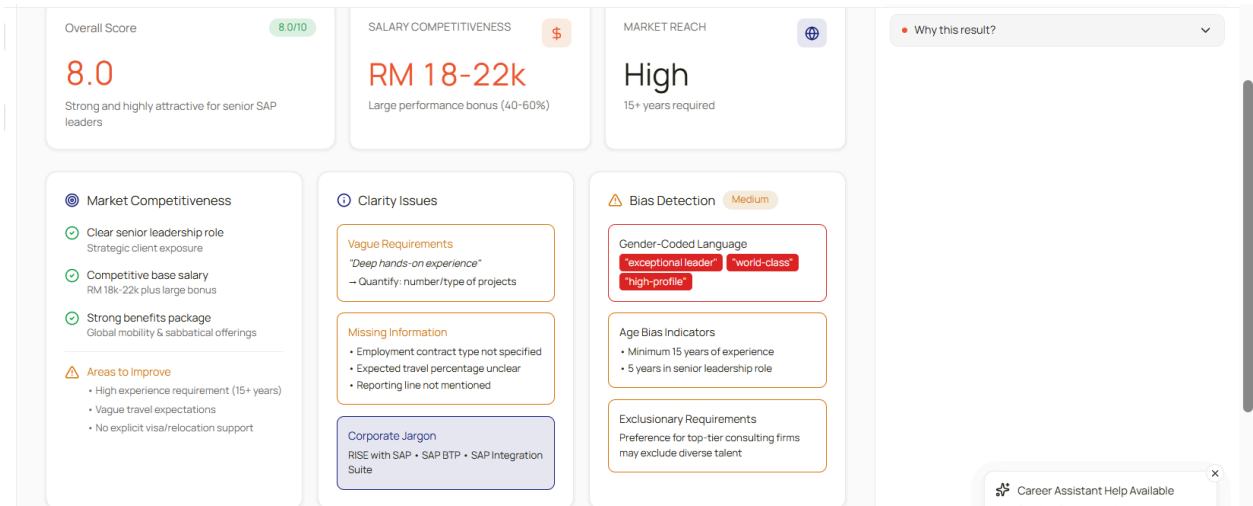

1. Please write JD score : 84% like this

ROLE	LOCATION	STATUS	APPLICANTS	JD SCORE	POSTED	
Software Engineer (Backend)	KL · Hybrid	Active	86	82	2d	Open →
Sales Manager — KL	KL · On-site	Active	42	64	5d	Open →

JD Analysis

1. When I open JD Analysis, it should show me the list of postings.. It shall not open me a direct one JD of any particular job opening.

2. Can utilize the blank space

Bias Analysis

1. When I click on Bias analysis, it should give me the list of Job posting, and when I click that it should give me the detail page of Bias Rectifications

Also pls utilize the blank space, a lot of empty space in left and right.

Q Search jobs, candidates, reports...

JD INCLUSIVITY SCORE

52 Multiple flags vs market peers

EMERGING COMPETITIVE STRONG ELITE

Flags found

4 flags

Gender-coded AI rewrite

ORIGINAL: "rockstar coder" SUGGESTED: "skilled engineer"

Why: 'Rockstar' correlates with male-skewed applicant pools (Gaucher et al., 2011).

Reject Apply

Age-coded AI rewrite

ORIGINAL: "energetic, young-at-heart team" SUGGESTED: "collaborative, fast-moving team"

Why: 'Young' is age-discriminatory under MY employment guidelines.

Reject Apply

Exclusionary AI rewrite

Hiring Assistant
Bias detection

RESULT
4 flags in this JD. Estimated reach increase if all fixed: **+62% qualified applicants.**

Fit Match

1. Fit match is generated against any specific job posting, here it is showing fit match score against nothing ..

So basically, when I select any opening, it shall then show me the Fit match result.

Interview Questions

1, Interview Question should be based on the specific job posting, not a generic one, kindly fix this.

Also utilize the blank space

h outcome · 5 (strong) – story + metrics + lessons + counter-

resolve it?
